The Gryphon School – Sex and Relationships Education (SRE) policy

At the heart of The Gryphon School is our determination that our community experiences "life in all its fullness" (John 10:10).

SRE at the Gryphon school is planned in accordance with the Equality Act 2010 and the Relationships and Sex Education (RSE) and Health Education statutory guidance from the Department for Education issued under Section 80A of the Education Act 2002 and section 403 of the Education Act 1996. It is also in line with Statutory guidance for governing bodies, proprietors, head teachers, principals, senior leadership teams, and teachers. July 2025

Brief Description of The School's Background

The Gryphon School is an 11 – 18 Church of England Voluntary controlled Comprehensive school which caters for all abilities. Students are predominantly of white British origin and pupils' socio-economic background broadly matches the national average.

Brief Description of SRE

RSE in secondary should provide a clear progression from primary relationships education. RSE should provide young people with the information they need to develop healthy, safe and nurturing relationships of all kinds. This should include the knowledge they need in later life to keep themselves and others safe, and how to avoid sexually transmitted infections and unplanned pregnancies

RSE is important, relevant and appropriate to the lives of young people, regardless of their family background or sexuality. The positive qualities of relationships, such as trust, honesty, and commitment, should be stressed, rather than the promotion of one form of sexual relationship or sexual orientation.

RSE is an integral part of the lifelong learning process, beginning in early childhood and continuing into adult life. We believe it should encourage personal and social development, fostering self-esteem, self-awareness, a sense of moral responsibility, and the confidence and ability to resist abuse and unwanted sexual experience

Policy into Practice

Organisation

Jackie Brighouse, PSHRE Coordinator, is presently the staff member who has the designated coordinator role for SRE. Stephanie Rann supports this coordination in her role as Personal Development Lead. In addition, Heads of Year oversee the delivery of SRE within their year teams, including provision from outside agencies. PSHRE is delivered by tutors during designated sessions with aspects also delivered in science,

computing, PE and religious education, thus promoting a whole school approach to emotional and social development. Since 2024 Year 8 students have had a one-hour lesson per fortnight with a PSHRE teacher to have greater input to various topics of the PHSE curriculum. In 2025, this was extended to year 9 students, who also have an additional one-hour lesson a fortnight with a specialist teacher.
Throughout the school programme aspects including work about human sexual behaviour, relationships, HIV/AIDS and self-esteem will be delivered age appropriately, in accordance with DfE 2025 guidance. The delivery of the content is made accessible to all pupils, including those with SEND.

Content Headings for the Programme

The DfE has established the content that students should cover by the end of secondary school. The Gryphon Schools SRE content will be in accordance with these requirements, ensuring that these topics are delivered, as appropriate to the age of the student. Please see the Content as outlined by the DfE in the table below:

Families / Relationships Education	**Curriculum content:** 1. That there are different types of committed stable relationships. 2. How these relationships might contribute to wellbeing, and their importance for bringing up children. 3. Why marriage or civil partnership is an important relationship choice for many couples. The legal status of marriage and civil partnership, including that they carry legal rights, benefits and protections that are not available to couples who are cohabiting or who have, for example, undergone a non-legally binding religious ceremony. 4. That 'common-law marriage' is a myth, and cohabitants do not obtain marriage-like status or rights from living together or by having children. 5. That forced marriage and marrying before the age of 18 are illegal. 6. How families and relationships change over time, including through birth, death, separation and new relationships. 7. The roles and responsibilities of parents with respect to raising children, including the characteristics of successful parenting and the importance of the early years of a child's life for brain development. 8. How to judge when a relationship is unsafe and where to seek help when needed, including when pupils are concerned about violence, harm, or when they are unsure who to trust.
Respectful relationships, including friendships **Relationships Education**	Curriculum content: 1. The characteristics of positive relationships of all kinds, online and offline, including romantic relationships. For example, pupils should understand the role of consent, trust, mutual respect, honesty, kindness, loyalty, shared interests and outlooks, generosity, boundaries, tolerance, privacy, and the management of conflict, reconciliation and ending relationships. 2. How to evaluate their impact on other people and treat others with kindness and respect, including in public spaces and including

	strangers. Pupils should understand the legal rights and responsibilities regarding equality, and that everyone is unique and equal. 3. The importance of self-esteem, independence and having a positive relationship with oneself, and how these characteristics support healthy relationships with others. This includes developing one's own interests, hobbies, friendship groups, and skills. Pupils should understand what it means to be treated with respect by others. 4. What tolerance requires, including the importance of tolerance of other people's beliefs. 5. The practical steps pupils can take and skills they can develop to support respectful and kind relationships. This includes skills for communicating respectfully within relationships and with strangers, including in situations of conflict. 6. The different types of bullying (including online bullying), the impact of bullying, the responsibilities of bystanders to report bullying and how and where to get help. 7. Skills for ending relationships or friendships with kindness and managing the difficult feelings that endings might bring, including disappointment, hurt or frustration. 8. The role of consent, including in romantic and sexual relationships. Pupils should understand that ethical behaviour goes beyond consent and involves kindness, care, attention to the needs and vulnerabilities of the other person, as well as an awareness of power dynamics. Pupils should understand that just because someone says yes to doing something, that doesn't automatically make it ethically ok. 9. How stereotypes, in particular stereotypes based on sex, gender reassignment, race, religion, sexual orientation or disability, can cause damage (e.g. how they might normalise non-consensual behaviour or encourage prejudice). Pupils should be equipped to recognise misogyny and other forms of prejudice. 10. How inequalities of power can impact behaviour within relationships, including sexual relationships. For example, how people who are disempowered can feel they are not entitled to be treated with respect by others or how those who enjoy an unequal amount of power might, with or without realising it, impose their preferences on others. 11. How pornography can negatively influence sexual attitudes and behaviours, including by normalising harmful sexual behaviours and by disempowering some people, especially women, to feel a sense of autonomy over their own body and providing some people with a sense of sexual entitlement to the bodies of others. 12. Pupils should have an opportunity to discuss how some sub-cultures might influence our understanding of sexual ethics, including the sexual norms endorsed by so-called "Involuntary celibates" (incels) or online influencers.

Online Safety and Awareness	Curriculum content: 1. Rights, responsibilities and opportunities online, including that the same expectations of behaviour apply in all contexts, including online. 2. Online risks, including the importance of being cautious about sharing personal information online and of using privacy and location settings appropriately to protect information online. Pupils should also understand the difference between public and private online spaces and related safety issues. 3. The characteristics of social media, including that some social media accounts are fake, and / or may post things which aren't real / have been created with AI. That social media users may say things in more extreme ways than they might in face-to-face situations, and that some users present highly exaggerated or idealised profiles of themselves online. 4. Not to provide material to others that they would not want to be distributed further and not to pass on personal material which is sent to them. Pupils should understand that any material provided online might be circulated, and that once this has happened there is no way of controlling where it ends up. Pupils should understand the serious risks of sending material to others, including the law concerning the sharing of images. 5. That keeping or forwarding indecent or sexual images of someone under 18 is a crime, even if the photo is of themselves or of someone who has consented, and even if the image was created by the child and/or using AI generated imagery. Pupils should understand the potentially serious consequences of acquiring or generating indecent or sexual images of someone under 18, including the potential for criminal charges and severe penalties including imprisonment. Pupils should know how to seek support and should understand that they will not be in trouble for asking for help, either at school or with the police, if an image of themselves has been shared. Pupils should also understand that sharing indecent images of people over 18 without consent is a crime. 6. What to do and how to report when they are concerned about material that has been circulated, including personal information, images or videos, and how to manage issues online. 7. About the prevalence of deepfakes including videos and photos, how deepfakes can be used maliciously as well as for entertainment, the harms that can be caused by deepfakes and how to identify them. 8. That the internet contains inappropriate and upsetting content, some of which is illegal, including unacceptable content that encourages misogyny, violence or use of weapons. Pupils should be taught where to go for advice and support about something they have seen online. Pupils should understand that online content can present a distorted picture of the world and normalise or glamorise behaviours which are unhealthy and wrong. 9. That social media can lead to escalations in conflicts, how to avoid these escalations and where to go for help and advice. 10. How to identify when technology and social media is used as part of bullying, harassment, stalking, coercive and controlling behaviour, and

	other forms of abusive and/or illegal behaviour and how to seek support about concerns. 11. That pornography, and other online content, often presents a distorted picture of people and their sexual behaviours and can negatively affect how people behave towards sexual partners. This can affect pupils who see pornographic content accidentally as well as those who see it deliberately. Pornography can also portray misogynistic behaviours and attitudes which can negatively influence those who see it. 12. How information and data is generated, collected, shared and used online. 13. That websites may share personal data about their users, and information collected on their internet use, for commercial purposes (e.g. to enable targeted advertising). 14. That criminals can operate online scams, for example using fake websites or emails to extort money or valuable personal information. This information can be used to the detriment of the person or wider society. About risks of sextortion, how to identify online scams relating to sex, and how to seek support if they have been scammed or involved in sextortion. 15. That AI chatbots are an example of how AI is rapidly developing, and that these can pose risks by creating fake intimacy or offering harmful advice. It is important to be able to critically think about new types of technology as they appear online and how they might pose a risk
Being safe **Relationships Education**	Curriculum content: 1. How to recognise, respect and communicate consent and boundaries in relationships, including in early romantic relationships (in all contexts, including online) and early sexual relationships that might involve kissing or touching. That kindness and care for others requires more than just consent. 2. That there are a range of strategies for identifying, resisting and understanding pressure in relationships from peers or others, including sexual pressure, and how to avoid putting pressure on others. 3. How to determine whether other children, adults or sources of information are trustworthy, how to judge when a relationship is unsafe (and recognise this in the relationships of others); how to seek help or advice, including reporting concerns about others, if needed. 4. How to increase their personal safety in public spaces, including when socialising with friends, family, the wider community or strangers. Pupils should learn ways of seeking help when needed and how to report harmful behaviour. Pupils should understand that there are strategies they can use to increase their safety, and that this does not mean they will be blamed if they are victims of harmful behaviour. Pupils might reflect on the importance of trusting their instincts when something doesn't feel right and should understand that in some situations a person might appear trustworthy but have harmful intentions.

	5. What constitutes sexual harassment or sexual violence, and that such behaviour is unacceptable, emphasising that it is never the fault of the person experiencing it. 6. That sexual harassment includes unsolicited sexual language / attention / touching, taking and/or sharing intimate or sexual images without consent, public sexual harassment, pressuring other people to do sexual things, and upskirting. 7. The concepts and laws relating to sexual violence, including rape and sexual assault. 8. The concepts and laws relating to harmful sexual behaviour, which includes all types of sexual harassment and sexual violence among young people but also includes other forms of concerning behaviour like using age-inappropriate sexual language. 9. The concepts and laws relating to domestic abuse, including controlling or coercive behaviour, emotional, sexual, economic or physical abuse, and violent or threatening behaviour. 10. That fixated, obsessive, unwanted and repeated behaviours can be criminal, and where to get help if needed. 11. The concepts and laws relating to harms which are exploitative, including sexual exploitation, criminal exploitation and abuse, grooming, and financial exploitation. 12. The concepts and laws relating to forced marriage. 13. The physical and emotional damage which can be caused by female genital mutilation (FGM), virginity testing and hymenoplasty, where to find support, and the law around these areas. This should include that it is a criminal offence for anyone to perform or assist in the performance of FGM, virginity testing or hymenoplasty, in the UK or abroad, or to fail to protect a person under 16 for whom they are responsible. 14. That strangulation and suffocation are criminal offences, and that strangulation (applying pressure to the neck) is an offence, regardless of whether it causes injury. That any activity that involves applying force or pressure to someone's neck or covering someone's mouth and nose is dangerous and can lead to serious injury or death. 15. That pornography presents some activities as normal which many people do not and will never engage in, some of which can be emotionally and/or physically harmful. 16. How to seek support for their own worrying or abusive behaviour or for worrying or abusive behaviour they have experienced from others, including information on where to report abuse, and where to seek medical attention when required, for example after an assault.
Intimate and sexual relationships, including sexual health	Intimate and sexual relationships, including sexual health Curriculum content: 1. That sex, for people who feel ready and are over the age of consent, can and should be enjoyable and positive. 2. The law about the age of consent, that they have a choice about whether to have sex, that many young people wait until they are older, and that people of all ages can enjoy

Sex Education	intimate and romantic relationships without sex. 3. Sexual consent and their capacity to give, withhold or remove consent at any time, even if initially given, as well as the considerations that people might take into account prior to sexual activity, e.g. the law, faith and family values. That kindness and care for others require more than just consent. 4. That all aspects of health can be affected by choices they make in sex and relationships, positively or negatively, e.g. physical, emotional, mental, sexual and reproductive health and wellbeing. 5. That some sexual behaviours can be harmful. 6. The facts about the full range of contraceptive choices, efficacy and options available, including male and female condoms, and signposting towards medically accurate online information about sexual and reproductive health to support contraceptive decision-making. 7. That there are choices in relation to pregnancy. Pupils should be given medically and legally accurate and impartial information on all options, including keeping the baby, adoption, abortion and where to get further help. 8. How the different sexually transmitted infections (STIs), including HIV/AIDs, are transmitted. How risk can be reduced through safer sex (including through condom use). The use and availability of the HIV prevention drugs Pre-Exposure Prophylaxis (PrEP) and Post Exposure Prophylaxis (PEP) and how and where to access them. The importance of, and facts about, regular testing and the role of stigma 9. The prevalence of STIs, the short- and long-term impact they can have on those who contract them and key facts about treatment. 10. How the use of alcohol and drugs can lead people to take risks in their sexual behaviour. 11. How and where to seek support for concerns around sexual relationships including sexual violence or harms. 12. How to counter misinformation, including signposting towards medically accurate information and further advice, and where to access confidential sexual and reproductive health advice and treatment
Mental Well-being **Health Education**	Curriculum content: 1. How to talk about their emotions accurately and sensitively, using appropriate vocabulary. 2. The benefits and importance of physical activity, sleep, time outdoors, community participation and volunteering or acts of kindness for mental wellbeing and happiness. 3. That happiness is linked to being connected to others. Pupils should be supported to understand what makes them feel happy and what makes them feel unhappy, while recognising that loneliness can be for most people an inevitable part of life at times and is not something of which to be ashamed. 4. That worrying and feeling down are normal, can affect everyone at different times and are not in themselves a sign of a mental health condition, and that managing those feelings can be helped by seeing them as normal.

	5. Characteristics of common types of mental ill health (e.g. anxiety and depression), including carefully-presented factual information about the prevalence and characteristics of more serious mental health conditions. This should not be discussed in a way that encourages normal feelings to be labelled as mental health conditions. 6. How to critically evaluate which activities will contribute to their overall wellbeing. 7. Understanding how to overcome anxiety or other barriers to participating in fun, enjoyable or rewarding activities – that it's possible to overcome those barriers using coping strategies, and that finding the courage to participate in activities which initially feel challenging may decrease anxiety over time rather than increasing it. 8. That gambling can lead to serious mental health harms, including anxiety, depression, and suicide, and that some gambling products are more likely to cause these harms than others. 9. That the co-occurrence of alcohol/drug use and poor mental health is common and that the relationship is bi-directional: mental health problems can increase the risk of alcohol/drug use, and alcohol/drug use can trigger mental health problems or exacerbate existing ones. That stopping smoking can improve people's mental health and decrease anxiety.
Wellbeing Online **Health Education**	Curriculum content: 1. About the benefits of limiting time spent online, the risks of excessive time spent on electronic devices and the impact of positive and negative content online on their own and others' mental and physical wellbeing. 2. The similarities and differences between the online world and the physical world, including: the impact of unhealthy or obsessive comparison with others online (including through setting unrealistic expectations for body image); how people may curate a specific image of their life online; the impact that an over-reliance on online relationships, including relationships formed through social media, can have. 3. How to identify harmful behaviours online (including bullying, abuse or harassment) and how to report, or find support, if they have been affected by those behaviours. 4. The risks related to online gambling and gambling-like content within gaming, including the accumulation of debt. 5. How advertising and information is targeted at them and how to be a discerning consumer of information online, understanding the prevalence of misinformation and disinformation online, including conspiracy theories. 6. The risks of illegal behaviours online, including drug and knife supply or the sale or purchasing of illicit drugs online. 7. The serious risks of viewing online content that promotes self-harm, suicide or violence, including how to safely report this material and how to access support after viewing it.

Physical health and fitness **Health Education**	Curriculum content: 1. The characteristics of a healthy lifestyle, including physical activity and maintaining a healthy weight, including the links between an inactive lifestyle and ill-health, including cardiovascular ill-health. 2. Factual information about the prevalence and characteristics of more serious health conditions. 3. That physical activity can promote wellbeing and combat stress. 4. The science relating to blood, organ and stem cell donation
Healthy eating **Health Education**	Curriculum content: 1. How to maintain healthy eating and the links between a poor diet and health risks, including tooth decay, unhealthy weight gain, and cardiovascular disease. 2. The risks of unhealthy weight gain, including increased risks of cancer, type 2 diabetes and cardiovascular disease. 3. The impacts of alcohol on diet and unhealthy weight gain.
Drugs, alcohol and tobacco **Health Education**	Curriculum content: 1. The facts about which drugs are illegal, the risks of taking illegal drugs, including the increased risk of potent synthetic drugs being added to illegal drugs, the risks of illicit vapes containing drugs, illicit drugs and counterfeit medicines, and the potential health harms, including the link to poor mental health. 2. The law relating to the supply and possession of illegal substances. 3. The physical and psychological risks associated with alcohol consumption. What constitutes low risk alcohol consumption in adulthood, and the legal age of sale for alcohol in England. Understanding how to increase personal safety while drinking alcohol, including how to decrease the risks of having a drink spiked or of poisoning from potentially fatal substances such as methanol. 4. The physical and psychological consequences of problem-use of alcohol, including alcohol dependency. 5. The dangers of the misuse of prescribed and over-the-counter medicines. 6. The facts about the multiple serious harms from smoking tobacco (particularly the link to lung cancer and cardiovascular disease), the benefits of quitting and how to access support to do so. 7. The facts about vaping, including the harms posed to young people, and the role that vapes can play in helping adult smokers to quit.
Health and prevention **Health Education**	Curriculum content: 1. Personal hygiene, germs and how they are spread, including bacteria and viruses, treatment and prevention of infection, and about antibiotics. 2. Dental health and the benefits of good oral hygiene, including brushing teeth twice a day with fluoride toothpaste and cleaning between teeth, reducing consumption of sugar-containing food and drinks, and regular check-ups at the dentist. 3. How and when to self-care for minor ailments, and the role of pharmacists as knowledgeable healthcare professionals.

	4. The importance of taking responsibility for their own health, and the benefits of regular self-examination and screening. 5. The facts and scientific evidence relating to vaccination, immunisation and antimicrobial resistance. The introduction of topics relating to vaccination and immunisation should be aligned with when vaccinations are offered to pupils. 6. The importance of sufficient good-quality sleep for good health, the importance of screen-free time before bed and removing phones from the bedroom, and how a lack of sleep can affect weight, mood and ability to learn. 7. The importance of healthy behaviours before and during pregnancy, including the importance of pre-conception health, including taking folic acid. The importance of pelvic floor health. Information on miscarriage and pregnancy loss, and how to access care and support. 8. How to navigate their local healthcare system: what a GP is; when to use A&E / minor injuries; accessing sexual health and family planning clinics; the role of local pharmacies; and how to seek help via local third sector partners which may have specialist services. 9. The concept of Gillick competence. That the legal age of medical consent is 16. That before this, a child's parents will have responsibility for consenting to medical treatment on their behalf unless they are Gillick competent to take this decision for themselves. Pupils should understand the circumstances in which someone over 16 may not be deemed to have capacity to make decisions about medical treatment.
Personal Safety **Health Education**	Curriculum content: 1. How to identify risk and manage personal safety in increasingly independent situations, including around roads, railways – including level crossings - and water (including the water safety code), and in unfamiliar social or work settings (for example the first time a young person goes on holiday without their parents). 2. How to recognise and manage peer influence in relation to risk-taking behaviour and personal safety, including peer influence online and on social media. 3. How to develop key social and emotional skills that will increase pupils' safety from involvement in conflict and violence. These include skills to support self-awareness, self-management, social awareness, relationship skills and responsible decision making, as well as skills to recognise and manage peer pressure. 4. Understanding which trusted adults they can talk to if pupils are worried about violence and/or knife crime. 5. The law as it relates to knives and violence. Content and examples should relate to the local context and avoid using fear as an educational tool. Children should be taught that carrying weapon is uncommon, and should not be scared into the perception that many young people are carrying knives (which can lead to the misconception that they need to carry a knife too).

	6. The risks and signs that they may be at risk of grooming or exploitation, and how to seek help where there is a concern.
Basic first aid **Health Education**	Curriculum content: 1. Basic treatment for common injuries and ailments. 2. Life-saving skills, including how to administer CPR. 3. The purpose of defibrillators, when one might be needed and who can use them.
Developing bodies **Health Education**	Curriculum content: 1. The main changes which take place in males and females, and the implications foremotional and physical health. 2. The facts about puberty, the changing adolescent body, including brain development. 3. About menstrual and gynaecological health, including: what is an average period; period problems such as premenstrual syndrome; heavy menstrual bleeding; endometriosis; and polycystic ovary syndrome (PCOS). When to seek help from healthcare professionals. 4. The facts about reproductive health, including fertility and menopause, and the potential impact of lifestyle on fertility for men and women.

Statement about Sensitive Issues

Sensitive issues such as contraception, sexually transmitted infections, sexuality and abortion will be delivered in a planned programme coordinated by the PSHRE Coordinator. These issues will be presented in a balanced way within a framework that recognises cultural, religious and social differences. It is hoped that pupils will develop the skills and confidence to respond to each other sensitively and to make informed decisions whilst retaining a considerate and tolerant approach to those whose beliefs may differ from their own in one way or another.

Pupils may ask questions about topics which go beyond any sex education covered by the school or relate to sex education from which they have been withdrawn. Teachers will handle such questions with an emphasis on supporting the child, which may include asking a pupil to speak to their parents or a trusted adult, signposting to support services where needed, and recognising that children whose questions go unanswered might instead turn to inappropriate sources of information, including online. Teachers will receive training and support in handling questions that may be better not dealt with in the classroom setting. The PSHE subject leader will provide guidance to staff who require support in responding to difficult questions.

When questions arise in SRE sessions about sensitive issues, they will be answered appropriately and where necessary, referrals made to appropriate outside or specialist agencies and or parents, for continued support and follow up. For extremely sensitive issues students have access to a range of support. We draw on the support of a wide range of community-based resources. If child protection issues arise the schools Child Protection procedures will be initiated (see Child Protection Policy).

Procedures for involving outside speakers

Delivery of SRE is not the sole responsibility of schools. It is important that visiting speakers work alongside teachers rather than substitute for them. It is essential that visiting speakers are well briefed so that their contribution fits appropriately into a planned and coordinated programme. Elements of SRE are also provided by a range of people in the wider community including parents, health professionals, social workers, youth workers, peer educators and visitors. People in the wider community have much to offer at all levels of planning and delivering SRE, bringing new perspectives and offering specialist knowledge, experience and resources.
When outside agencies provide classroom sessions, they must be aware of and follow the confidentiality policy of the school and the child protection procedures

Working with Parents

This policy is available for inspection by parents, via the school's website and on-site access. In addition, information regarding SRE content will be made available on the school's website. Designated senior staff are available to provide advice to parents: the Head: James Gower and the Assistant Head teacher: Stephanie Rann Parents are also encouraged to discuss issues with their child's tutor or Head of Year.

The right of withdrawal

In secondary education from September 2020 Parents will not be able to withdraw their child from any aspect of Relationships Education or Health Education. Parents can withdraw their child (following discussion with the school) from any or all aspects of Sex Education, other than those which are part of the science curriculum, up to and until three terms before the child is 16. The topic marked as **Sex Education** in the table above demonstrates which aspects this includes.

Monitoring and Evaluation

Pupils' evaluation will take place at the end of each session. These results will inform teaching strategies and enhance future programmes. The Leadership Team will meet with the SRE/PSHE teams to discuss issues and allow time for professional development. Yearly reviews of the PSHE program will be completed with input from staff and students.

This policy should be read in conjunction with the school's Child Protection Policy, Behaviour Policy and Anti-Bullying Policy.
